Your First Choice for Floating Dock Solutions

## **AccuDock® completes one of a kind 10 lane start dock at Nathan Benderson State Park**

Sarasota, FL – April 28, 2015 - **Nathan Benderson State Park** is a 600 acre multi-use sporting venue located in Sarasota, FL, right off the Gulf of Mexico amongst some of the most pristine and picturesque beaches in the world. One of the focal points of this naturally beautiful park is the 500 acre lake that boasts a 2000 meter, fully FISA compliant, rowing course. It was recently announced that for the first time in over 20 years, the World Rowing Championships will be held in the United States at Nathan Benderson State Park in the Fall of 2017.

The next phase of construction is about to begin which includes state of the art timing towers, a world class boathouse, grand stands and other amenities. Every attention to detail is being paid to ensure that each aspect of the rowing facility is top notch; which includes the world's only 10 lane start dock that was manufactured and recently installed by **AccuDock®**. When construction commences, the rowing facility at Nathan Benderson State Park is slated to be the only permanent Class A international rowing facility in North America.

AccuDock®, an international **floating dock** manufacturer, regarded worldwide for their expertise in low profile rowing docks designed and constructed this customized 10 lane start dock, complete with retractable finger docks and pivoting aligner planks that the angle can be adjusted to suit the individual needs of each boat holder. The decision was made to deck this start dock with PVC **AccuDeck™** in order to match the two 16' x 80' launch docks and 18' x 40' aluminum ramps that AccuDock® had previously manufactured and installed. A combination of fully framed heavy duty **aluminum dock** sections (with a freeboard of 16") and low profile **rowing dock** sections (with a freeboard of 7") for the finger docks were used to create this one of a kind 10 lane 425' start dock. Additional features that help to maximize the functionality of the start dock include adjustable aligner planks that pivot vertically to give each individual boat holder optimum positioning for holding each shell and **retractable finger docks** that effortlessly slide in and out to accommodate varying shell lengths.

**Insert quote from Bob here – relating to the functionality and performance of the start dock**

As one of the world's leading custom floating dock manufacturers, AccuDock® specializes in **floating docks**, **floating platforms**, **residential floating docks**, low profile **rowing docks**, and **paddle sport docks** (kayak docks, canoe docks and paddle board docks) for outdoor enthusiasts worldwide.
